

Business Proposal (Demo) - Page 1

Executive Summary:

This proposal presents a fictional business case to demonstrate Vaultiva's secure document sharing workflow. It illustrates password authentication, expiry timers, download limits, and embedded watermarking for safe preview.

Objectives:

- Protect confidential information while enabling controlled sharing.
- Reduce unauthorized redistribution via visual watermarking and access limits.
- Improve auditability through activity logging and access history.

Deliverables & Scope:

- A proof-of-concept environment for secure previews.
- Demo assets with persistent watermarks for public showcases.
- Documentation of the sharing flow and protection policies.

Note: All names, metrics, and data are placeholders for demonstration only.
